Thursday, March 22, 1917

As far as private underwriters are concerned the war risk insurance business will probably soon be a thing of the past. The open market rate on vessel and cargo passing through the barred zone now averages, as it has for some time past, 10 per cent; the government War Risk Insurance Bureau is writing at 3 per cent. Consequently, the volume of business handled by the bureau has expanded greatly, while the amount, written through the regular channels has diminished rapidly, it being impossible for private companies to meet the government's rate. There is, however, a considerable amount of business still being handled in the open market. The government is writing a maximum of \$1,250,000 on any single cargo and hull, and will not insure vessels carrying arms and ammunition. All of the latter business is still transacted in the usual way, and since the average hull and cargo are worth at least double the government's maximum, the surplus, too, is carried by private underwriters, some of it at rates much above that named. On one American ship which has an unusually valuable cargo, as much as 21 per cent was paid to insure a part of the surplus

It is believed, however, that as soon as the anticipated declaration of a state of war is made, the War Risk Bureau will immediately remove all restrictions as to amount and character of cargo, and when that is done the market will automatically come to an end. Until recently, the government has taken only preferred risks, and has refused to insure vessels carrying contraband. Therefore, it has made a handsome profit to date, about \$3,-000,000. Writing unrestrictedly at ained by the British government, it and notwithstanding the fact that they will lose a source of much profit, underwriters say that it is necessary business and provide adequate in-

surance at reasonable rates.

The British government has pro-

vided a greater proportion of its war

above the government's limit.

expenditure out of taxes than any of the other belligerents. The amount raised by taxation in the fiscal year which ends with the last day of this month will, it is estimated, be in the neighborhood of \$2,500,000,000. That is an increase compared with the last from August 1, 1914, to March 31, lows: 1917, will be approximately \$2,700,-000,000, which may be taken as rep resenting the net amount raised by taxes toward defraying the cost of war. Great Britain has borrowed about \$19,500,000,000 for war purposes. Contrasted with this huge sum, the part played by taxation in war finance does not appear to be imposing. The tax revenue equals less than 14 per cent of the war borrowing and under 13 per cent of the tetal cost of the war to Britain. In the Napoleonic and Crimcan wars 47 per cent of the cost was paid out of taxes. When it is considered that New York \$611,941,531 \$29,156,903 interest on the British war debt will | Baltimore soon be in the neighborhood of a Boston billion dollars a year, the necessity of a further increase in taxation is ap- St. Louis...... 22,068,970 4,725,734

The best opinion in England fa-ors the adoption of a more extenvors the adoption of a more extenvors the adoption of a more extensive tax programme. "The London Silver.—Bars in London, 35% pence; New York, 72% cents; Mexican dollars, Economist." for example, in its issue 55% cents. of March 3, says:

encourages the Chancellor to continue along the primrose path of borrowing and to neglect the sounder method of paying for war by taxation. The loan has shown him how great our financial resources are if they are husbanded. The way to husband them, so that we can go on with the war for years if necessary, is to take more of people's money and borrow less of it, so that consumption may be forcibly reduced, and all the nation's energy may be devoted to the war and to financing it abroad by exports. If this can be done, and if the very much overdue supervision of government spending can be made effective, we can go on with the war "till further notice," and we shall

rious fiscal problems to face, "The Economist" points out that Other it is much easier to raise taxes in war time than in peace, and it may, moreover, be beneficial, especially as it is necessary to check the extravagance of those who do not heed the

appeal made on patriotic grounds.

emerge from it with much less se-

Elsewhere in Europe the proportion of the war's cost paid by taxation has been insignificant. In Germany, particularly, taxation has been avoided to as great an extent as possible. That may be due in part to the fact that the hope of ex- row limits in a dull market yesterday.

acting huge indemnities is still fostered. A recent issue of the "Cologne Gazette" gives for the first time an estimate of German expecta-

tion in that respect, when it says: The extent of our claims cannot be discussed here, but, in any case, we might well consider the idea that our might well consider the idea that our Lire, checks 7.80 enemies should pay us annually for Lire, cables a series of years from 5,000,000,000 | Swiss, checks...... marks (\$1,250,000,000) to 6,000,000, Swiss, cables...... marks (\$1,250,000,000) to 6,000,000;
000 marks (\$1,500,000,000), and that they should pay it in the first years, Reichsmarks, cables... 69 while they also will be short of (Quoted cents to the unit.) money, in raw materials, which would Guilders, checks..... 403g while they also will be short of render us good service in the res- Guilders, cables 40 toration of our economic system. In the later years they would pay in gold for the redemption of our debt.

In any case, the war indemnity is the most pressing demand which we shall have to make at the conclusion of peace. It will carry us over the period of stagnation which otherwise awaits us, and it will to a great extent put upon the right shoulders the leaden weight of milliards of which the former Secretary of State for the Treasury spoke at a time when the weight was not nearly so oppressive.

The delusion that it will be possible to exact even this modest sum or anything at all, for that matter-from the enemy is apt to prove disastrous for Germany, if, as the other shoulders, is much the safer.

Money and Credit

The money market yesterday was The money market yesterday was quieter. Rates as a rule remained unaltered. Loans based on industrial securities as collateral continue in favor with borrowers in the time market. Banks were willing to extend accommodation yesterday for four, five and six months at 4 to 4½ per cent, according to the character of the collateral. Money can be borrowed on a mixture of railway and industrial securities at 3½ to 4 per cent, depending on the date of maturity.

No signs appear of any diminution in the supply of call money. Yesterday the ruling rate was 2¼ per cent, deared of directors was reflected at yesterday's annual meeting. John J. quieter. Lack of Funds Stops Work on Chinese Railways

\$35,000,000 Needed for Construction Contemplated by American Interests

W. F. Carey, president of the Siems-Carey Railway & Canal Company, which is undertaking the construction work of some seven hundred miles of railroad lines and the improvement of the Grand Canal in China, the financing arrangements for which are in the hands of the American International Corporation, has returned to New York from Peking. In view of the complicated interna-

tional situation, it is impossible, Mr. Carey said, to state when funds will be available to begin the construction of the proposed lines. The amount needed to complete the railroad work in China immediately contemplated by the interests which Mr. Carey represents is approximately \$35,000,000, or \$50,000 a mile. The American International Corporation expects to float a loan in New York to cover this cost as soon as conditions will permit.

"Survey parties have now been organized," said Mr. Carey, "and three are at work on the line from Chinchou, a point on the Canton-Hankow line, and running westward for a distance of about four hundred miles. These survey parties are in charge of American engineers, George A. Kyle being chief engineer in charge of construction. A large number of young Chinese engineers, many of whom are graduates of American universities and technical schools, are employed. T. C. Sun, a graduate of Cornell University, is the director general in charge of these "The construction of the line last

mentioned will probably be undertaken first. This road runs over a densely populated country, the products of which have now no outlet. This outlet will be secured by connecting up with the Peking-Hankow line, from which goods will go down to the Yang-tse River and thence to the sea.' Asked regarding cooperation with the Japanese in connection with the im-

provement of the Grand Canal, Mr. Carey stated an attempt had been made to clothe this with political significance because of the questions which the Japanese government had asked regarding the American contract for the work on the section in the Province of Shantung. Mr. Carey said this was a business matter pure and simple, and he thought

the simultaneous issue of securities in New York and Tokio would facilitate "In China," he added, "where a number of foreign interests have already been established, it is essential to the success of any business undertaking that friendly relations should be main-
